Document Type: Executive Cloud Financial Audit

Prepared For: Stayee Anywhere Executive Leadership & Engineering Team

Author: CTO & Principal DevOps Architect

Date: July 22, 2026

Account Model: AWS 2025/2026 Credit-Based Free Tier ($200 Credit / 6-Month Plan)

---

1. Executive Summary & Account Balance

This audit presents the complete, verified financial breakdown of AWS cloud infrastructure expenditure for **Stayee Anywhere** from initial environment setup through **July 22, 2026**.

Financial Highlights

- **Net Out-of-Pocket Cost to Organization: $0.00 USD** (₹0.00 INR)
- **Initial AWS Promotional Credits Granted: $200.00 USD**
- **Total Historical Usage Consumed: -$4.82 USD** *(Covered 100% by AWS Credits)*
- **Active Credit Balance Remaining: $195.18 USD**
- **Current Monthly Burn Rate: ~$4.25 USD / month** *(Covered 100% by remaining credits)*

```
┌──────────────────────────────────────────────────────────────────────┐
│                        ACCOUNT BALANCE SUMMARY                       │
├───────────────────────────────────────┬──────────────────────────────┤
│ AWS Credit Grant (6-Month Plan)       │ $200.00 USD                  │
│ Consumed Credits (Setup Phase)        │ -$4.82 USD                   │
│ ───────────────────────────────────── │ ──────────────────────────── │
│ NET REMAINING CREDIT BALANCE          │ $195.18 USD (~₹16,200 INR)   │
│ INVOICED OUT-OF-POCKET EXPENSE        │ $0.00 USD                    │
└───────────────────────────────────────┴──────────────────────────────┘
```

2. AWS Credit Program & Policy Context

AWS Credit-Based Model

As of AWS's Free Tier policy update, accounts operate under a **Credit-Based Model**:

- **Grant Allocation:** $200.00 USD in promotional credits over a 6-month account plan.
- **Credit Offset Mechanism:** All AWS infrastructure services (compute, database, network routing, static IPs, and statutory taxes) generate standard line-item charges that are **100% offset by the active credit pool**.
- **Invoicing:** So long as active promotional credits exceed incurred usage, **zero charge** is billed to the organization's credit card.

3. Historical Spend Line-Item Reconciliation ($4.82 USD)

Between **July 19 and July 21, 2026**, initial VPC network configuration incurred a historical total of **$4.82 USD**. This spend was driven by temporary NAT Gateway and VPC Endpoint resources used during database migration:

JULY 19 – 21	NAT Gateway Runtime	$0.045 / hour	~41.0 hours	**$1.85 USD**	**Deducted from Credits**
JULY 19 – 21	NAT Gateway Bandwidth Processing	$0.045 / GB	~23.3 GB	**$1.05 USD**	**Deducted from Credits**
JULY 19 – 21	2x VPC Interface Endpoints (SSM/ECR)	$0.010 / hr each	~82.0 endpoint-hrs	**$0.82 USD**	**Deducted from Credits**
JULY 19 – 22	Public IPv4 Address (Attached to EC2)	$0.005 / hour	~72.0 hours	**$0.36 USD**	**Deducted from Credits**
JULY 19 – 22	Statutory 18% GST / Tax	18% on Subtotal	—	**$0.74 USD**	**Deducted from Credits**
TOTAL	**All Incurred Historical Usage**	—	—	**$4.82 USD**	**100% Offset by Credits**

> [!IMPORTANT] **Architecture Optimization Note:**
> On **July 21, 2026**, the NAT Gateway ($32.40/mo base + bandwidth) and VPC Interface Endpoints ($14.40/mo base) were permanently deleted and replaced with a zero-cost **Internet Gateway (IGW)** architecture. Charges for NAT Gateway and VPC Endpoints ceased immediately.

4. Live Infrastructure Resource Audit

A live AWS CLI resource audit conducted on **July 22, 2026** confirms that no high-cost or orphaned networking resources exist in the account:

```
┌────────────────────────────────────────────────────────────────────────┐
│                        LIVE RESOURCE AUDIT MATRIX                      │
├───────────────────────────────┬────────────┬───────────────────────────┤
│ Resource Type                 │ Status     │ Cost Status               │
├───────────────────────────────┼────────────┼───────────────────────────┤
│ NAT Gateways                  │ 0 Active   │ $0.00 / month (DELETED)   │
│ VPC Interface Endpoints       │ 0 Active   │ $0.00 / month (DELETED)   │
│ EC2 Instance (t3.micro)       │ 1 Active   │ Billed to Credits         │
│ RDS Database (db.t4g.micro)   │ 1 Active   │ Billed to Credits         │
│ Amazon CloudFront CDN         │ Active     │ $0.00 / month (Free)      │
│ Amazon S3 Storage             │ Active     │ $0.00 / month (Free)      │
│ Public IPv4 Address           │ 1 Active   │ ~$3.60 / month            │
└───────────────────────────────┴────────────┴───────────────────────────┘
```

5. Forward-Looking Cost Forecast & Budget Projection

Following the VPC architecture optimization, the ongoing account burn rate has dropped significantly:

Daily & Monthly Run-Rate Table

RESOURCE	SERVICE TYPE	DAILY COST (USD)	MONTHLY COST (USD)	6-MONTH PROJECTION
EC2 Server (`t3.micro`)	Compute	~$0.25	~$7.50	Billed to Credits
RDS Database (`db.t4g.micro`)	PostgreSQL DB	~$0.38	~$11.50	Billed to Credits
Public IPv4 Address	Network IP	~$0.12	~$3.60	Billed to Credits
Internet Gateway (IGW)	Routing	$0.00	$0.00	$0.00
NAT Gateway & Endpoints	Routing	**$0.00**	**$0.00**	**$0.00 (DELETED)**
Estimated 18% Tax / GST	Statutory Tax	~$0.13	~$4.00	Billed to Credits
NET TOTAL BURN	**All Infrastructure**	**~$0.88 / day**	**~$26.60 / month**	**Billed to Credits**

Page 4 of 5

6. Credit Lifespan & Financial Conclusion

- **Remaining Credit Balance: $195.18 USD**
- **Projected Monthly Usage: ~$26.60 USD / month**
- **Projected Credit Lifespan:**

$$\text{Credit Lifespan} = \frac{\$195.18}{\$26.60 \text{ / month}} \approx \mathbf{7.33} \text{ Months}$$

Key Takeaways for Leadership:

1. **Zero Cash Outlay:** The organization will pay **$0.00 out of pocket** for all cloud infrastructure.
2. **Full Credit Coverage:** Remaining credits ($195.18 USD) exceed the total required budget for the remainder of the 6-month plan.
3. **Optimized Infrastructure:** All recurring high-cost VPC resources (NAT Gateways, VPC Endpoints) have been eliminated.
